

Meet Nurse Erin Brennan

Nurse Family Partnership at Project Self-Sufficiency

Offering Safe, Personalized Care for Pregnant Women, Mothers & Young Children

I am excited as I begin my journey at Project Self-Sufficiency as a Nurse Home Visitor and educator for the Nurse Family Partnership Program. I am beyond proud to say that I am a Registered Nurse (RN) for this amazing organization. I am joining a wonderful team of nurses that have been very helpful and encouraging as I learn my way. Project Self-Sufficiency and its staff are truly something special. I can honestly say that this is my dream job; or how I like to call it, this is my “what I want to do when I grow up” job.

I am a mother of 3 children. I received a Bachelor of Science Degree in Nursing from Hunter-Bellevue School of Nursing in New York City. I have been an R.N. for 15 years. I have 11 years Maternal-Child experience working on the Maternity Unit at Staten Island University Hospital. I worked in the newborn nursery as well as with post-partum and antepartum mothers, educating and helping them care for their new babies. Before that, I worked for 4 years with adults on the Medical/Surgical Unit.

Working with mothers and babies as a nurse has been my passion, inspiration and motivation. I am happy to go to work each day doing what I love. Working with mothers and babies in the hospital was an invaluable learning experience for me and I bring that knowledge with me on this new journey at Project Self Sufficiency. I am looking forward to all the positive partnerships that I will form with my clients and to the new experiences that I will gain from these partnerships. It is a rewarding experience for me to assist, guide, educate, support, encourage and motivate mothers, and to watch them succeed, even if it is small steps forward.

I am eager to get out there in the community and work with first time expecting mothers, as I help them to recognize their strengths, achieve their goals, and become the best they can be for themselves and for their babies. The Nurse Family Partnership program aims to improve pregnancy outcomes, improve child health and development, and improve mothers' self-sufficiency. It is a different kind of nursing, but it is special and unique because the nurse has a partnership with the mother through pregnancy and follows the child from birth up until 2 years of age. The Nurse Family Partnership program is important to ensure first time mothers succeed and that their babies grow and develop to succeed in life as well.
